1. EUPHA update

EUPHA Past President Walter Ricciardi new President of ISS

Walter Ricciardi, EUPHA Past-President, has been appointed as President of the National Institute of Health (Istituto Superiore di Sanità, ISS) in Italy, of which he was Commissioner for the past twelve months. Walter Ricciardi - who acquired numerous scientific merits - is Professor of Hygiene at the Catholic University of the Sacred Heart, Rome. From 2010 to 2014 he was President of the European Public Health Association (EUPHA) and, previously, held numerous positions in the Italian Society of Hygiene, Preventive Medicine and Public Health (SIItI). Congratulations, Walter and best wishes for your work.

EUPHA supports Joint action plan launched by 17 European health and social care organisations

Active ageing in Europe through falls prevention:

On 1 October 2015 17 European organisations of professionals in health and social care are issuing a joint commitment to promote active ageing through falls prevention. In a joint action plan these organisations state that evidence shows that falls should no longer be considered an inevitable part of ageing.

Falls can be prevented by involving all relevant professionals and carers who can help older adults to remain active and healthy as long as possible. Although there is strong evidence for the effectiveness of fall-prevention, only a few regions in Europe have consistent and wide implementation of validated interventions.

2. European Public Health Conference

Programme and speakers update

Preconference: Ensuring resilient and sustainable health systems: Challenges and opportunities from EU level cooperation

Wednesday 14 October, 09:00-17:00, Amber 8

This day-long preconference looks at challenges and opportunities arising from EU level cooperation in creating resilient and sustainable health systems. With: Maria Iglesia, DG SANTE, Till Voigtländer, ERN Board of MS, Natasha Azzopardi Muscat, EUPHA, Henrique Martins, eHealth Network, Nick Fahy, United Kingdom, Katarzyna Przybylska, Poland, Marina Karanikolos, Observatory, Nina Renshaw, EPHA, Helmut Brand, Health Forum Gastein. Organised by CHAFEA, EUPHA, Observatory, Health Forum Gastein. Read the programme [here](#).

Workshop: Global health and capacity building

Thursday 15 October, 16:00-17:30, Suite 3

The European Commission aims to strengthen the capacity of health policy institutions in developing countries through the 'Supporting Public Health Institutes Programme'. With Kevin McCarthy, European Commission, EuropeAid, Albrecht Jahn, Germany, Florence Fouque, World Health Organization, Jaap Koot, The Netherlands. Read the abstract [here](#).

Round Table: Strengthening vaccination strategies: the role of Europe

Thursday 15 October, 13:50 – 15:20, Auditorium

With: Hon. Beatrice Lorenzin, Minister of Health, Italy (invited), Isabel de la Mata, European Commission, Luc Debruyne, GSK Vaccines, Reda Guiha, Pfizer Vaccines, David Khougazian, Sanofi Pasteur MSD, Roberta Siliquini, Italy and Aura Timen, EUPHA Section Infectious diseases. Moderated by Carlo Signorelli and Walter Ricciardi, Italy. Organised by EUPHA and SITl, financially supported by Vaccines Europe/EFPIA.

Lunch Symposium: Creating a favourable ecosystem to unlock the potential of integrated personalised diabetes management in Europe

Friday 16 October, 12:35 – 13:45, Amber 3

With: Nick Guldemon, University Medical Centre Utrecht, The Netherlands, Jelka Zaletel, National Institute of Public Health, Slovenia, Graziano Onder, Università Cattolica del Sacro Cuore, Italy, David Smith, European Health Management Association, Bastian Hauck, Patient representative. Moderator: Lars Kalfhaus, Roche Diabetes Care. Organised by EUPHA Section Public Health Genomics, Università Cattolica del Sacro Cuore, Roche Diabetes Care. Read the programme [here](#).

Lunch Symposium: Immunization as key public health intervention: challenges and opportunities in Europe

Friday 16 October, 12:35 – 13:45, Amber 4

What are the objectives of the European Vaccines Action Plan for 2015-2020? With: Pietro Luigi Lopalco, University of Bari, Italy, Thomas Breuer, GSK Vaccines. Chair: Giovanni Rezza, Istituto Superiore di Sanità, Italy. Funded by GSK.

Registration

Online registration is [open](#) until the end of Sunday 4 October 00.00 CET. Onsite registration in Milan opens Wednesday 14 October. Please note that cash payment in Milan is not possible, only by PayPal online.

3. EUPHA members update

European Society for Prevention Research (EUSPR) - <http://euspr.org/euspr-2015/>

The European Society for Prevention Research (EUSPR) is holding its 6th International Conference in Ljubljana, Slovenia on 22-24 October 2015. The conference theme: "Changing Behaviour without Talking: automatic processes and the regulation of behaviour". We will convene pre-conference workshops with our Science for Prevention Academic Network (SPAN) partners on the 21st October.

4. European Journal of Public Health

The [European Journal of Public Health](#) is a multidisciplinary journal in the field of public health. The EJPH is published bimonthly. The journal provides a forum for discussion and debate of current international public health issues with a focus on the European region. In 2014, the impact factor of the journal is at 2.591. The 5-year impact factor is 2.512.

The EJPH is the official journal of EUPHA.

5. Call for proposals, job opportunities

The French National Cancer Institute calls for a Research Chair

The French National Cancer Institute in partnership with the University Lille 3 and the French cancer research sites SIRIC ONCOLille, is opening a research chair position in social and human sciences applied to cancer. Deadline for applications is 28 October 2015.

More information (in french) is available at <http://www.e-cancer.fr/Professionnels-de-la-recherche/Appels-a-projets-en-cours/Chaire-de-recherche-en-SHS>

The Leibniz Institute for Prevention Research and Epidemiology calls for 2 Doctoral Positions Epidemiology & Public Health

Starting at the earliest in December 2015 for three (two plus one) years.

Tasks:

- Conduct your own research project for your doctoral degree (Dr PH)
- Participate in the institute's structured doctoral programme
- Publish your research in peer-reviewed international journals

Requirements:

- Excellent Master's degree in epidemiology, public health or related disciplines
- Thematic interest in one of the core research areas of the department
- Strong research orientation
- Strong quantitative skills, interest in mixed methods research
- Excellent English language skills

Desirable:

- First experiences in writing scientific research articles and in giving presentations
- International research and/or educational experience

What we offer: Doctoral candidates are free to pursue their own research topics, but they are integrated in our research team facilitating intellectual exchange and scientific advice in a friendly and dynamic atmosphere. Access to existing data sets and to field sites will be provided as feasible. The institute's doctoral programme offers the opportunity to develop thematic research and broad scientific skills. Our national and international collaboration networks can be used for academic exchange.

How to apply: Please send us your preliminary dissertation proposal, a CV and a copy of your Master's certificate. The dissertation topic should be related to one of the three thematic fields. BIPS is an equal access and equal opportunities employer. Applicants with disabilities will be preferentially considered given comparable professional and personal qualifications.

Application deadline: 15. October 2015. Later applications will also be accepted unless the posts are filled. For more information: www.bips-institut.de

6. Interesting news

World Obesity Day 11 October 2015 - Overcoming the biggest challenge

The World Obesity Federation is pleased to announce that the first World Obesity Day will take place on 11 October 2015. The obesity epidemic is rapidly becoming the biggest public health challenge globally, ranking in the top three causes of chronic ill-health globally. There are no countries which have turned around the epidemic, and there are enormous commercial interests opposed to effective public health policies. We Must Act Now.

As part of the inaugural World Obesity Day we are calling for action and asking for everyone, especially governments, to 'Act Now' and to join us in our efforts to rise to the challenge of overcoming obesity worldwide so as to help build a healthier future for all.

For updates, resources and information about how to get involved with World Obesity Day, please visit <http://www.worldobesity.org/what-we-do/action-initiative/aiprogrammes/world-obesity-day/> #WorldObesityDay – Overcoming the biggest challenge. We Must Act Now

Cochrane Public Health reaches out to Europe!

Five institutions from Germany, Austria and Switzerland join forces to establish a European satellite of Cochrane Public Health with the goal of supporting and disseminating the work of Cochrane Public Health in Europe and beyond, and to strengthen European collaboration in public health research.

For more information: [Cochrane Public Health Europe](http://www.cochrane.org/europe).

Interesting articles on Science Daily

Genetic testing all women for breast cancer might not be worth the cost

Women who are carriers of mutated BRCA genes are known to have a significantly higher risk for developing breast and ovarian cancers than those who don't have the mutations. But a new study questions the value of screening for the genetic mutations in the general population—including those who do not have cancer or have no family history of the disease—because of the high cost.

Upward trend in hepatitis C infection rates among HIV-positive MSM

A systematic review and meta-analysis of studies characterizing the incidence of the sexual transmission of HCV among HIV-positive MSM has been conducted by researchers. The high reinfection rates and the attributable risk analysis suggest the existence of a subset of HIV-positive MSM with recurring sexual exposure to HCV. Approaches to HCV control in this population will need to consider the changing epidemiology of HCV infection in MSM.

Breast cancer incidence, death rates rising in some economically transitioning countries

A new study finds breast cancer incidence and death rates are increasing in several low and middle income countries, even as death rates have declined in most high income countries, despite increasing or stable incidence rates. The findings come from a new report examining global patterns and trends in breast cancer using the most up-to-date cancer registry-based data available.
