

8º CONGRESSO
INTERNACIONAL DOS HOSPITAIS
SAÚDE 6.0: PESSOAS E TECNOLOGIA

8TH INTERNATIONAL
HOSPITAL CONGRESS
NOVEMBER, 26-27, 2020

Framework

Health 6.0: People and Technology

Global health and social systems are facing nowadays not only challenges, like aging population, increasing chronic diseases and multimorbidity among patients, but also increased health inequalities and costs and expectations for a personalized care approach and even some new challenges, such as the importance of health promotion or the risk of new pandemics.

While searching the solutions to address many of these challenges, the enormous evolution of technology innovation in the health sector happened. In the last decades have been developed many innovative and disruptive solutions, with a great impact on patients, health professionals and organizations themselves, not only at the technological, but also at the organizational and managerial level.

The [Congress](#) aims to understand how can we integrate the progress of technology in peoples' well-being and wellness, clinical practice and health management, and will at the same time look at future challenges. The discussion will be concentrated on three dimensions: (1) Technology, Innovation and Knowledge; (2) People, Organizations and Professionals; and (3) Health and Wellness & COVID-19 pandemic.

*The Congress language will be Portuguese, with the exception of the Opening Conference that will be in Spanish and Opening Ceremony that will be in English.
